LÜRAFLEX® Gerhard Lückenotto	**Questionnaire for LÜRAFLEX spreader rolls**	date: 27.02.15

Company _____ Telephone _____

Contact person _____ E-Mail _____

Application information:

Type of materials: ☐ textile ☐ foil ☐ paper ☐ other: _____

Material thickness (µm ou mm) _____ web width (mm) _____

Weight (g/m²) _____ material temperature (°C) _____

web speed (m/min) _____ tension (daN/cm) _____

wrap angle (°) _____ installation position ◯ wet ◯ dry

roller data:

cover length (mm) _____ end sides to be covered ◯ no ◯ yes

face length (mm) _____ journals to be covered ◯ no ◯ yes

total length (mm) _____ journal diameter / length (mm) _____

core diameter (mm) _____ hardness (Shore A / P&J) _____

finished diameter (mm) _____

chemical influences:

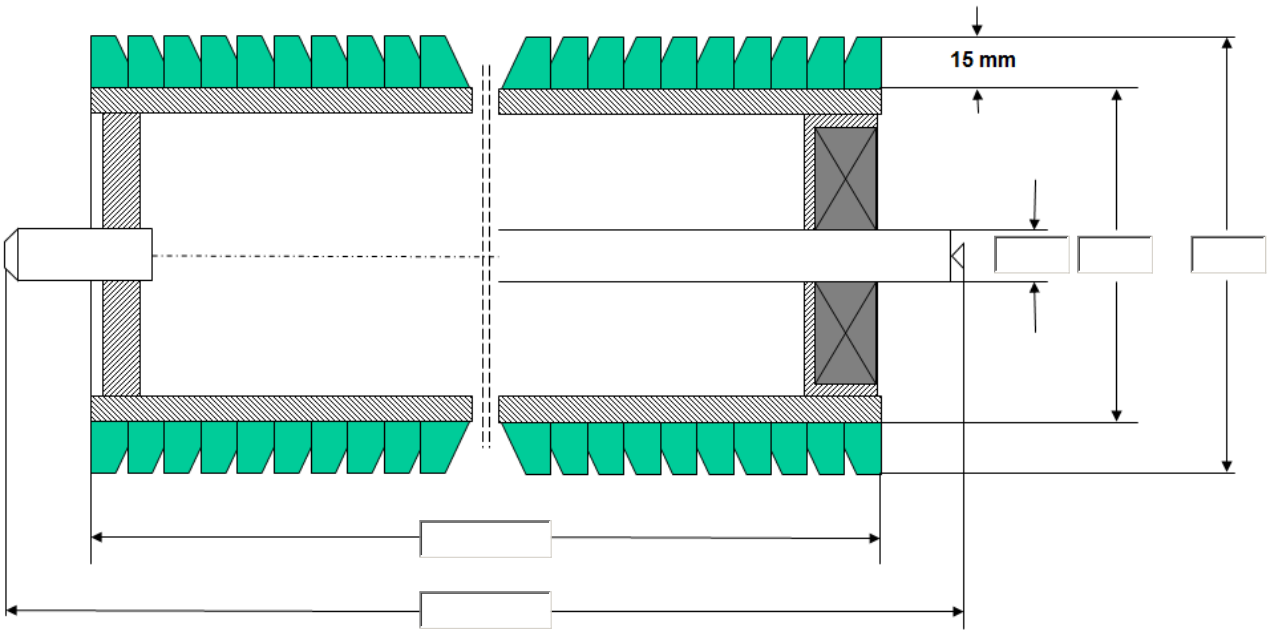
☐ acids ☐ alkali ☐ oil ☐ solvent

comments / details: _____

other operational requirements _____

Core:

◯ core with fixed journals ◯ core with internal bearings and continuous shaft

◯ new core (manufactured based on customer specification (drawing or scale sketch) ◯ existing core


core material: ◯ steel ◯ aluminium ◯ other: _____
