

Company _____ Telephone _____

Contact person _____ E-Mail _____

Application information:

Type of materials: textile foil paper other: _____

Material thickness (µm ou mm) _____ web width (mm) _____

Weight (g/m²) _____ material temperature (°C) _____

web speed (m/min) _____ tension (daN/cm) _____

wrap angle (°) _____ installation position wet dry

roller data:

cover length (mm) _____ end sides to be covered no yes

face length (mm) _____ journals to be covered no yes

total length (mm) _____ journal diameter / length (mm) _____

core diameter (mm) _____ hardness (Shore A / P&J) _____

finished diameter (mm) _____ cooling: no yes
 external internal

chemical influences: acids alkali oil solvent

comments / details: _____

other operational requirements _____

Core:

core with fixed journals core with internal bearings and continuous shaft

new core (manufactured based on customer specification (drawing or scale sketch) existing core

core material: steel aluminium other: _____
